

Spun DACRON® Double Braid Ropes (Soft Fuzzy Cover)

The low-stretch characteristics and soft woolly surface of this rope offers excellent gripage and is easy on the hands. This is a sound choice to replace manila rope in general stage and counter-weight requirements.

An inner braided core of filament polyester and outer braided cover featuring Dupont's type 77 spun Dacron®.

- High strength & Low Stretch
- Soft texture with excellent grip and handling characteristics
- Easily spliced and weathers well
